To all EUROTOX Members

Subject: **Call for Proposals for the EUROTOX 2011 Scientific Programme**

Dear Colleagues,

On behalf of the whole Scientific Programme Committee (SCP), I invite you to submit your proposal(s) for the EUROTOX 2011 Congress that will be held in Paris, from August 28 - 31, 2011.

Your input is required to prepare an innovative and relevant scientific programme covering the most up to date topics. Please suggest sensible topics in toxicology for symposia and workshops. All other suggestions to improve coming congresses are also highly appreciated.

We urge all Individual Members, Member Societies and Corporate Members, as well as Scientific Partners to contribute. Only a common effort will guarantee a high quality programme and keep our annual congress a reference point for the toxicologists not only in Europe but also internationally.

Please submit your scientific proposals using the attached form, together with the organizer details, the recommended speakers and a brief presentation for the proposal. **Send your proposals to Dr. Nancy Claude (nancy.claude@fr.netgrs.com) by December 4, 2009.**

The **EUROTOX 2011 Scientific Programme Committee** members are:

- Nancy Claude Vice-President and Chair of the EUROTOX 2011 SPC;
- 2010 LOC Scientific Programme Committee
 - Bernard Salles, Chair
 - Frederic Baud, Member
- Corrado L. Galli, EUROTOX Executive Member
- Chairs of the EUROTOX speciality sections
 - Nursen Basaran, Carcinogenesis
 - Karl H. Cohr, Risk Assessment
 - Emanuela Corsini, Immunotoxicology & Chemical Allergy
 - Jean-Lou Dorne, Molecular Toxicology
- Christina Rudén, EUROTOX 2012 LOC Chair

We also urge you to support and encourage young scientists in your proposals. They are always one of our priorities; taking part in symposia and workshops is still an important activity to help them develop their scientific and professional skills.

Thank you in advance for your continuous support and contribution, and I look forward to receiving your proposal.

Yours truly,

Dr. Nancy Claude
