

R&D Product Safety & Regulatory Affairs - Global Project Stewardship (m/f)

For our Product Safety & Regulatory Affairs (PS&RA) group in Brussels, we are looking for a Global Project Leader (m/f) with a strong interest in (human) toxicology and in regulatory affairs.

Role Description:

The successful candidate will be responsible for providing global Product Safety & Regulatory Affairs (PS&RA) stewardship for a Fabric & Home Care category. You will articulate Human Safety, Regulatory and Environmental Safety/Sustainability guidance to R&D and business partners. This requires regular interactions with initiative teams and close collaboration with functional PS&RA experts and regional colleagues to ensure both functional and regional perspective is reflected in the scope of global projects. In addition, you may be engaged as EU regulatory expert providing functional support in this area. Within our worldwide PS&RA organization, you will be part of a group of managers responsible for developing and implementing safety and regulatory solutions for our detergent and cleaning products. You will be given specific responsibilities on key projects that will involve part or all of the following, depending on the size and complexity of the project:

- Define and evaluate technical options for achieving business objectives with focus on safety and regulatory compliance.
- Prepare expert reviews, dossiers and risk assessments for product launches and ongoing support for product marketing.
- Develop new work processes supporting safety and regulatory decision making and establish these work processes across the organization.

Your first assignment gives you the chance to immediately contribute to the business, while further developing your professional skills and learning on the job. You will have clear project responsibilities of your own and will be involved in other projects that stretch your functional and project management abilities. You will work in professional and entrepreneurial cross-functional teams in one of the company's major business categories, our Fabric & Home Care business unit. Your colleagues and coach will provide valuable mentoring, in addition to functional and corporate trainings that will be provided to accelerate your development.

Qualifications:

You have an advanced university degree (PhD) in life sciences, with a strong focus on human/environmental safety and/or regulatory toxicology. In addition to technical excellence, you are able to demonstrate leadership skills and you work effectively with others. You should be self-starting and fluent in English.

Application:

Please apply on-line at <http://www.pgcareers.com> > Advanced Job Search > search for job number **RND00002082** (keep an electronic copy of your CV in English ready to attach to your application). P&G is an equal opportunity employer
