

Head of Clinical Pathology Department – Non-Clinical Safety

France's leading independent pharmaceutical group, Servier Group is present internationally in 146 countries on 5 continents. Each day, 21,400 people work together to develop innovative and effective therapeutic axes for patients and doctors.

To consolidate our teams we are looking for a Head of Clinical Pathology Department – Non-Clinical Safety”
Job located within the Non-Clinical Safety Pole of Expertise, Gidy (Orléans, France)

Job description :

We are currently seeking a Head of Clinical Pathology, who will be responsible for the scientific and technical coordination of the lab activities and management of 5 skilled scientist/technicians. You will work on a daily basis alongside other local experts, in particular the Study Directors and Project Leaders responsible for the non-clinical safety of our drugs.

Directly reporting to the test Site Manager, you will join a team of ~90 persons, working on the non-clinical evaluation of our drug candidates. Our facility, strongly committed to innovation, is primarily dedicated to the selection and early evaluation of our molecules. This includes a comprehensive range of activities on multiple animal species and cellular models, together with the scientific support of various laboratories (anatomic pathology, pre-formulation and analytics, clinical pathology ...).

Furthermore, in the context of the future regrouping of our research activities in a brand new-state-of-the-art centre in Paris Saclay in 2020, you will actively participate to the development of your future team, organization and eventual re-location from Gidy to Paris-Saclay end of 2020.

Key Roles and activities

- Leadership & management of a team of scientists and technicians ; Coordination of the laboratory activities including technical support, budgets, planning and performance
- Scientific supervision of analyses and interpretation for an integrated risk assessment, in close interaction with other scientists
- Scientific review of study plans and reports for our external studies
- Maintenance and implementation of initiatives for continuous improvement of the clinical pathology Dept
- Actively follow the discipline to promote external partnership or interlaboratory working groups
- Champion the laboratory transition to the future Research centre in Paris Saclay

Skills and experience

- Ideally Doctorate in Veterinary medicine, with a veterinary clinical pathology training. Previous experience in non clinical drug development is essential
- PhD degree , Pharm D with a degree in clinical pathology
- Strong knowledge in non clinical development legislation and strategies
- Management and leadership capabilities
- Oral and written English. French is essential
- Excellent oral and written communication skills
- Good network and team-building skills.

If you recognize yourself in this description and you feel ready to take this challenge, send us your application , ref.584, to: katia.da-cruz@servier.com
