

For our Global Registration activities we are recruiting a

Senior Toxicologist

Job description

- Providing scientific and strategical regulatory toxicological advice and support to registration product managers
- Design and monitoring of both standard toxicological and mode of action/investigative studies in support of registration of active substances
- Developing expert positions on specific areas of toxicology, explanation and discussion with regulatory authorities
- Working together with the existing expert team in all areas of human health risk assessment – specialization is possible in hazard characterization, modelling, exposure studies, livestock-/rat-metabolism, residues

Requirements:

- University degree in toxicology or related science, min. 5 years experience in toxicology and min. 5 years in agrochemicals
- Deep understanding of the challenges of agrochemical development and registration across all areas of human safety
- PhD, ERT/DABT and hands-on experience in study conduct are a plus
- Team working capabilities
- Willingness for limited travel
- Good knowledge of English

The position is open ended.

If you want to implement your know-how in a future-oriented company, a performance-related payment and furthermore also like to work in a dedicated and motivated team, send your complete application documents - preferably by email to stefanie.hugo@adama.com.

Of course we will treat your application confidential.

We look forward to receiving your application!
