Attendees: Helena Kandárová, Nynke Kramer and Mathieu Vinken.

1. The In2TOX webmeeting will be organized on 29 September 2021 (10h00-11h00) as part of the virtual EUROTOX congress (27 September-1 October 2021). The program of the meeting is the following:
   - 10h00-10h15: Overview of In2TOX activities (Mathieu Vinken, Vrije Universiteit Brussel-Belgium).
   - 10h15-10h30: PBTK model to evaluate bisphenols actual exposure in toxicological experiment using zebrafish eleutheroembryos (Rémy Beaudouin, INERIS-France).
   - 10h30-10h45: The role of QSAR and read-across in supporting the AOP framework (Alessandra Roncaglioni, Istituto di Ricerche Farmacologiche Mario Negri-Italy).
   - 10h45-11h00: Expanding the frontiers of computational toxicology: a regulatory perspective (Alicia Paini, European Commission JRC-Italy).

2. Helena Kandárová has decided to step down as In2TOX officer because of time restrictions. The In2TOX officers thank Helena for her commitment over the past 2 years. Because of this resignation, a second position for a new In2TOX officer has become available.

3. An expression for interest for a new In2TOX officer, preferably with an industrial background, has been sent by e-mail to all In2TOX members on 29 March 2021 and was open until 1 May 2021. A total of 2 applications (curriculum vitae and motivation letter) was received, namely from Gladys Ouedraogo and Barbara Birk. All applications were considered eligible nominations for voting by the election committee consisting of Jean-Lou Dorne, Helena Kandárová, Nynke Kramer and Mathieu Vinken. Subsequently, anonymous e-voting was organized between 1 and 15 May 2021.
among the In2TOX members. A total of 39 votes was received with the vast majority positive about the 2 candidates. Based on these results, it was decided to appoint both Gladys Ouedraogo and Barbara Birk as new In2TOX officers for a first term of 3 years. They will be officially introduced during the In2TOX meeting taking place on 29 September 2021. Another meeting with the new In2TOX officers will be organized after 29 September 2021 in order to distribute tasks. Nynke Kramer volunteered to take over the communication activities from Helena Kandárová.

4. The In2TOX workshop entitled “New approach methodologies for systemic toxicity testing: a transatlantic perspective” to be set up as a Current Topics in Toxicology (CCT) initiative together with the In Vitro and Alternative Methods Specialty Section of the Society of Toxicology (IVAM-SOT), the European Society of Toxicology In Vitro (ESTIV) and the American Society for Cellular and Computational Toxicology (ASCCT) was supposed to be organized as a satellite event of the SOT2022 conference, which will take place 27-31 March 2022 in San Diego-USA. However, it seems that this is the week before the Easter break in most of Europe. As a consequence, a number of organizers and speakers are not available. For this reason, the workshop has been again postponed to the SOT2023 conference, which will take place 19-23 March 2023 in Nashville-USA. The program of the workshop will be the following, but may be subject to change:

- 12h30-12h45: Welcome and introduction to the workshop (Sean C. Gehen (Corteva Agriscience, Indianapolis-IN) and Mathieu Vinken (EUROTOX In2TOX)).
- 12h45-13h15: US perspective on 3Rs alternatives for systemic toxicity testing (Russell Thomas (EPA National Center for Computational Toxicology, Durham-NC)).
- 13h15-13h45: Case study 1 (Ellen Berg (Eurofins Discovery, Burlingame-CA)).
- 13h45-14h05: Case study 2 (Carl Westmoreland (Unilever-UK)).
- 14h25-14h45: Case study 3 (Benjamin Smith (A*Star-Singapore)).
- 14h45-15h00: Coffee break.
- 15h00-16h30: Break-out sessions (Pamela Spencer (Angus Chemical Company, Mundelein-IL)), (Sean C. Gehen (Corteva Agriscience, Indianapolis-IN)), Mathieu Vinken (EUROTOX In2TOX)).
- 16h30-17h15: Reports from the break-out sessions and plenary discussion.
- 17h15-17h30: Conclusions and adjourn (Sean C. Gehan (Corteva Agriscience, Indianapolis-IN)).

5. A call for submission for session proposals for the 16th International Congress of Toxicology (ICT2022) taking 18-22 September 2022 in Maastricht-The Netherlands has been sent out the In2TOX members. Mathieu Vinken has submitted a proposal entitled “The European ONTOX project: ontology-driven and artificial intelligence-based repeated dose toxicity testing of chemicals for next generation risk assessment”, which is linked to the In2TOX activities.

6. The In2TOX group on LinkedIn now has 60 members. Most of the posts still come from the In2TOX officers. EUROTOX has again advertised the In2TOX LinkedIn group through e-mailing and website. Helena Kandárová has generated an In2TOX company profile on LinkedIn in order to increase visibility and reach more people.
