GBA ICCR
TOXICOLOGICAL SERVICES

GBAGROUP

Responsibilities

- You define the site's **scientific strategy**, provide **toxicology leadership**, and advise **senior management** on scientific and business opportunities.
- You translate the scientific strategy into **operational excellence** while ensuring **GxP**, **DIN EN ISO/IEC 17025**, and **regulatory compliance**.
- You ensure that **SOPs**, **computerized systems**, **CAPA processes**, and **scientific integrity** support compliant and high-quality study execution.
- You collaborate with **Quality**, **regulatory authorities**, **customers**, and **internal stakeholders** to ensure scientific excellence and regulatory compliance.

The **GBA Group** is an international life sciences service provider delivering analytical, logistical, and specialized solutions to the pharmaceutical, medical device, cosmetics, chemical, food, drinking water, and environmental industries.

Our success is built on the expertise, collaboration, and commitment of our people. We foster an inclusive and supportive environment where teamwork, continuous learning, and professional development go hand in hand. Whether you are an experienced specialist or an aspiring leader, you'll find

- You support **customer relationships**, **business development**, **global collaboration**, and the **Preclinical Business Unit**.
- You **lead**, **coach**, and **develop** a team of **Study Directors** while fostering a high-performance culture.
- You act as **Deputy Test Facility Manager** and ensure **operational continuity** during the Test Facility Manager's absence.

Requirements

- You hold a **degree in Toxicology** and ideally possess **ERT certification**.
- You have **10+ years of leadership experience**, **CRO toxicology expertise**, and **genetic toxicology** knowledge.
- You have in-depth knowledge of **GxP**, **DIN EN ISO/IEC 17025**, **regulatory requirements**, and **quality management systems**.
- You demonstrate **scientific writing**, **analytical thinking**, **strategic thinking**, and **scientific credibility**.
- You communicate confidently with **customers**, **regulatory authorities**, **international stakeholders**, and demonstrate excellent **stakeholder management**.
- You are an inspiring **leader** with strong **people management**, **organizational**, and **decision-making** skills.
- You are fluent in **German (C2)** and **English (at least B2)** and are willing to **travel** for business purposes.

Benefits

opportunities to grow your career, broaden your expertise, and make a meaningful impact. Together, we drive scientific excellence and shape the future of life sciences.
